PROFESSIONAL SUMMARY

Full Stack Developer and Computer Science undergraduate (UFAPE, expected graduation December 2027), with 2+ years of experience building enterprise public-sector systems with Java, Spring Boot and PostgreSQL, used by municipalities such as Correntes, Calçados, Paranatama and Bom Conselho, totaling more than 30 management units. Experience in microservices architecture, React/Next.js frontends, cloud (Google Cloud, Terraform, CI/CD) and applications with AI and computer vision. Background in scientific research, university outreach projects and teaching assistance.

TECHNICAL SKILLS

Back-end: Java, Spring Boot, JSF/PrimeFaces, Python, FastAPI, Node.js, microservices, REST APIs

Front-end: TypeScript, JavaScript, React, Next.js, HTML, CSS, Flutter

Data & AI: PostgreSQL, Google ADK, Vertex AI, TensorFlow, computer vision, pandas, NumPy, SciPy, Streamlit, Plotly

Cloud & DevOps: Docker, Terraform, Google Cloud, AWS, GitHub Actions (CI/CD), Git

Languages: Portuguese (native), English (intermediate)

PROFESSIONAL EXPERIENCE

Full Stack Developer | WS Assessoria e Consultoria Municipal (freelance) | Oct 2025 – Present

Garanhuns, PE

- Building WS-Services, a microservices ecosystem for municipal public management, covering architecture, development, infrastructure and deployment.
- Platform serves municipalities such as Correntes, Calçados, Paranatama and Bom Conselho, totaling more than 30 management units.
- Migrated the legacy public accounting system to the new platform, following TCE (AUDESP) regulations.
- Designed and developed the Procurement, Bidding and Warehouse modules.
- Validated application designs with the Product Owner before implementation.

Web/Java Developer (internship) | WS Assessoria e Consultoria Municipal | Jun 2024 – Sep 2025

Garanhuns, PE

- Maintained and built features in Java 8, JSF and PrimeFaces systems used by city governments.
- Modeled and optimized PostgreSQL queries.
- Fixed bugs and handled client requests (municipalities); worked with the public ERP e-Cidade (PHP).

Teaching Assistant, Human-Computer Interaction | UFAPE (volunteer) | Sep 2025 – Present

Garanhuns, PE

- Mentored students in interface design, prototyping and usability evaluation; 12 hours per week.

Extension Scholar (PIBEX) – Developer | Federal University of Agreste of Pernambuco (UFAPE) | Aug 2026 – Present

Garanhuns, PE

- Building a support and information app for women at risk (Social Technology and Femicide Prevention project, PIBEX UFAPE 2026 call).
- Gathered requirements and designed interfaces focused on usability, security and privacy; 20 hours per week.

Undergraduate Research Fellow (PICP) | UFAPE | May 2025 – Mar 2026

Garanhuns, PE

- Compared energy consumption, memory and performance of algorithms generated by different LLMs across several programming languages.
- Automated data collection and code generation through LLM APIs.
- Statistical analysis with pandas, NumPy and SciPy and an interactive Streamlit/Plotly dashboard.

Computer Vision Developer (research fellow) | BCC Coworking – MonitoraMar Project | Feb 2024 – Mar 2025

Garanhuns, PE

- Developed computer vision models (Python, TensorFlow) to detect risk situations for swimmers on the Recife coast.
- Processed images from fixed cameras and drones for real-time monitoring and integration with alert systems.

Frontend Developer (PAVI) | UFAPE – Animal Anatomy and Pathology Laboratory | Apr 2024 – Oct 2024

Garanhuns, PE

- Built the frontend in an interdisciplinary team (Computer Science and Veterinary Medicine), 276 hours.
- Helped build an image dataset for classifying feline and ruminant livers.

Full Stack Developer and Teaching Assistant | Multidisciplinary Laboratory of Social Technologies (LMTS) – UFAPE | Jun 2023 – Jun 2024

Garanhuns, PE

- Built the web platform and mobile app for managing Community Native Seed Banks (COPPABACS, Alagoas semi-arid region).
- Lab teaching assistant (2023.1 and 2024.1), supporting new members.
- Presented at the II Extension and Culture Congress (CONEX 2023); lab projects contributed to UFAPE's 2024 SDG Education Seal.

SELECTED PROJECTS

- **LinkedIn Profile Analysis (AI Specialist Program, Sauter University + Google Cloud):** AI agent with Python, FastAPI, Google ADK and Vertex AI, deployed to Cloud Run with Terraform and CI/CD.
- **HoraCerta:** multi-tenant SaaS for transport timetables with Java 21, Spring Boot, Next.js, PIX payments and Docker/Nginx deployment (private repository).
- **GoRunning:** sports events marketplace with PIX registration and automatic split payments via Asaas (private repository).
- **analyze-llm-code-efficiency:** github.com/AdnRamos/analyze-llm-code-efficiency

EDUCATION

B.Sc. in Computer Science | Federal University of Agreste of Pernambuco (UFAPE) | Jan 2022 – Dec 2027 (expected)
